**System Integration
Services**

Delta Systems Engineering offers expert system integration services designed to help you improve performance and reduce costs through

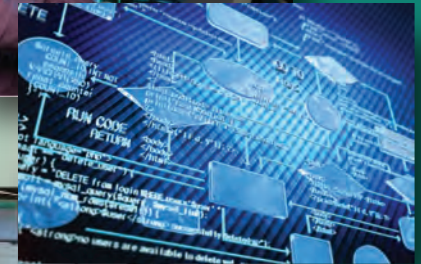

state-of-the-art automation. We approach each project with a thorough understanding of the challenges you face and the need to deliver complex control solutions on time, within budget, and with minimal disruption to daily operations.

Our library of logic allows us to create programs more efficiently, and then test them in our offices before we deploy them in the field.

Preventative Maintenance & Annual Support Service Plans

A critical system failure that shuts down plant operations is not the time to begin seeking qualified hardware and software technicians. Let DeltaSE provide a preventive maintenance program to tackle problems before they grow into serious system failures.

We offer a cost-effective support service contract to provide the following scheduled and unscheduled maintenance activities:

- Field Instruments
- SCADA system computers
- Human-machine interface software
- PLC programs

Partner Trusted & Endorsed

DeltaSE works closely with our software providers to ensure that our team stays on the leading edge of technology so that we can offer the knowledge, training, and hands-on experience required to meet our Clients' needs.
